PROFILE

A skilled Full Stack Developer with 2 years of experience in JavaScript, React, Python, Node.js, Next.js, and Tailwind CSS. Originally from India and currently residing in Malaysia under an Employment Pass (EP). Successfully launched two major projects: a virtual chip design system and a loan management system. Currently working at Instapay as the Lead Developer on two integration projects using Vue.js, collaborating within a team of 4. Projects include integrating a Human Resource Management System (HRMS) and an Accounting System. Passionate about building scalable, user-centric applications and driving team performance through technical leadership.

WORK EXPERIENCE

Software Developer April 2025 - Present

Instapay Technologies

- Currently leading two integration projects using Vue.js as the core frontend framework.
- Working in a team of 4, overseeing development and ensuring timely delivery of project milestones.
- Project 1:** Integrating a Human Resource Management System (HRMS) into the existing platform, focusing on seamless user experience and secure data handling.
- Project 2:** Integrating an Accounting System, aligning frontend components with API architecture for accurate financial data presentation.
- Developing and maintaing multiple e-wallet features, enhancing the core digital payments experience for users.

Web/Mobile Developer January 2024 - Present

Freelance

- Developed custom websites using WordPress, HTML, and CSS, ensuring responsive design and optimized performance, resulting in enhanced user experience across all devices.
- Built and deployed mobile applications using Angular, delivering seamless cross-platform solutions for both iOS and Android, which improved accessibility and broadened the user base.
- Created an e-commerce site using Shopify, which now handles hundreds of customers daily, providing a reliable and scalable platform for client sales and customer engagement.

Full Stack Developer August 2021 - June 2023

Esolved MSC Sdn. Bhd

- Successfully developed and launched two high-value projects, each worth over \$22,000, driving substantial revenue and achieving high client satisfaction.
- Created a loan management system for a client, which was later sold to hundreds of vendors, showcasing its scalability and market demand.
- Collaborated closely with clients to gather requirements and develop precise project specifications, ensuring alignment with business goals and end-user expectations.
- Developed multiple web applications using MERN stack, ColdFusion, and MySQL, delivering solutions capable of handling thousands of users with complex functionalities.
- Gained hands-on experience in project management, technical design, and the full software development lifecycle, reducing project turnaround times by 20% through efficient workflow strategies.
- Conducted software testing to ensure functionality, usability, and reliability, which reduced post-launch issues by 30% and enhanced user experience.
